Dear Mr. Justin Swanson,

We at the Chabad in Granite Bay are extremely satisfied with the services Swan Engineering provided for us during the summer of 2011. You, and all others involved, did great work, very professionally done, according to the agreed upon time table, and keeping the cost to the minimal possible.

You went above and beyond to complete the job in the best possible way, even paying attention to additional details which came up along the construction process, without continued change order fees.

We greatly appreciate your work, highly recommend your service, and would most definitely consider using your service again in the future, should we need such work again.

Sincerely,

Rabbi Yossi Korik
