Swan Engineering
420 Berry Street
Roseville, CA 95678

Subject: Recommendation

To whom it may concern:

We have been acquainted with Justin Swanson (Swan Engineering) for approximately 10 years, during which he has provided services to Sunworks on our large Solar PV construction projects as well as agriculture specific solar installations. Swan Engineering specializes in several scopes including civil construction scopes, installation of ground mount racking systems consisting of screw and driven piles and all associated racking components. Swan Engineering is a contractor who has a firm grasp on their various scopes and responsibilities.

During this time, we have worked on over 10 projects together and over \$10,000,000 worth of Solar PV projects. Swan Engineering has never caused our company any grief and has always done what they said they were going to do, meeting all schedules, deadlines, completing all tasks, and responding to all service or warranty calls.

We have no regrets when we send them contracts to perform what they say they will perform and will continue to work with them on future Solar projects.

If you have any questions please feel free to call me directly.

Sincerely,
CEO
916-532-9465
